### Mental Health Support at La Salle

The La Salle High School Counseling Department offers your son academic, college/career and emotional support in a variety of ways. This includes collaboration and consultation with teachers and staff, individual check-ins on an as-needed basis and classroom guidance lessons. In the wake of the COVID-19 pandemic, the counseling department is looking to provide increased support by offering a school-wide mental health needs assessment and counseling groups for the 2022-23 school year. The mental health needs assessment will be distributed and collected electronically during Flex bell on **September 29**.

The results of the mental health needs assessment will be **confidential** and will only be used by the La Salle High School Counseling Department to better support your son. Based on the information we are able to gather, we will invite students to participate in counseling groups as an extra layer of support. Counseling groups are made up of a small number of students led by a trained mental health professional with a focus on a specific topic. Counseling groups can be effective by helping to reinforce skills and encourage learning without the intimidation of a large group setting. We emphasize that groups are for everyone and participating does not necessarily indicate a problem. We believe that all students can learn from and provide support for each other.

If you would **not** like your son to complete the mental health needs assessment and/or participate in counseling groups, please email [Zach Schmucker](#) to opt out by **September 28**.
