

Students taking College Algebra in the 2020-21 School Year

In preparation for the upcoming school year, students are expected to review all topics in the quick links provided for the course they are going into. **During the first week of the school year, students will take an assessment** that will count toward their 1st quarter grade over the specific topics for the course they will be taking this school year. The topics should ALL be a review of previously learned material. Each link provides an explanation of the topic (including recorded video demonstrations) as well as practice problems with immediate feedback. This review is expected to be completed prior to the first day of school.
